MEMORANDUM FOR: Deputy Director for Administration

FROM: James H. McDonald  
Director of Logistics

SUBJECT: Procurement and Installation of Load  
Banks to be Used for Uninterruptible  
Power Source Testing

BAG - 10

As part of a program to enhance the reliability of the Agency's Uninterruptible Power Source (UPS) systems, the Office of Logistics requires a rapid-response UPS testing capability. To implement this capability, a project to procure and install load bank testing equipment has been established. Implementation of this project will allow a thorough testing of our UPS systems under a variety of load and operational conditions without jeopardizing the operation of computer center equipment. Appropriate funding has been identified, and it has been estimated that this project will cost approximately \$60,000. It is requested and recommended that this project be approved.

/s/ James H. McDonald
